

Peripheral Water Pump for Fluid Transfer

This peripheral pump is designed for fluid transfer applications. It is suitable for clean water and non-corrosive liquids, with a compact design ideal for space-constrained environments.

Product Overview

Peripheral Water Pump Overview

This peripheral water pump is engineered for efficient fluid transfer in various applications, including domestic water supply, pressure boosting, and small-scale irrigation. Featuring a compact footprint, it is an ideal solution for space-constrained environments. The robust construction and peripheral impeller design ensure reliable performance and a long service life when handling clean water and non-corrosive liquids.

Technical Specifications

Fluid Compatibility

Clean Water • Non-corrosive Liquids

Pump Type	Peripheral
Application Suitability	Domestic Water Supply, Pressure Boosting, Small-scale Irrigation

Design & Construction

Construction Features

- Robust housing construction
- Compact footprint design
- Blue-colored pump housing
- Black motor enclosure
