

Permanent Magnetic Lifter for Steel Plates and Blocks

This permanent magnetic lifter is designed for lifting steel plates and blocks. It features a high-performance permanent magnetic material and a two-pole design for flat and round loads.

Overview

Industrial Permanent Magnetic Lifter

This industrial-grade permanent magnetic lifter is designed for the safe and efficient handling of steel plates and blocks. Utilizing high-performance neodymium magnets, it provides a reliable lifting solution for various industrial applications. The device is built for durability and consistent performance, featuring a temperature operating range suitable for diverse work environments.

Technical Specifications

Lifting Capacity Range

100 kg Minimum Capacity	5000 kg Maximum Capacity
-----------------------------------	------------------------------------

Magnet Composition	Neodymium Magnet
Operating Temperature	-40°C to +80°C
Safety Factor	3.5

Model Selection

Model Specifications

Rated Capacity (kg)	Max Breakaway Force (kg)	Dimensions (cm)	Net Weight (kg)
100	300	24*16*16	3
400	1200	32*20*17	10
600	1800	37*30*21	20
1000	3000	43*28*24	37
2000	5000	52*30*31	68
3000	7500	60*30*31	87
4000	10000	68*30*41	113
5000	12500	73*40*48	198
