

Personal Cooling Desk Fan

This compact desk fan is designed for personal cooling. It features a multi-blade propeller enclosed within a protective cage and an adjustable tilt mechanism.

Overview

Compact Cooling Solution

This personal cooling desk fan is engineered for efficiency and convenience in both home and office environments. Featuring a multi-blade propeller design, it delivers consistent airflow while maintaining quiet operation. The unit is built with a sturdy base for stability and includes an adjustable tilt mechanism, allowing users to direct cooling exactly where it is needed most.
