

Personal Cooling Electric Fan

This is a portable electric fan designed for personal cooling. It features a multi-blade propeller enclosed within a safety grill and rotary controls for adjusting fan speed.

Product Overview

Compact Personal Cooling Solution

This portable electric fan is engineered for efficient personal cooling in both home and office environments. Featuring a multi-blade propeller design enclosed within a protective safety grill, it balances performance with user safety. Its lightweight construction, complemented by an integrated carrying handle and simple rotary speed controls, ensures effortless portability and operation.
