

Personal Transportation Tricycle with Car Body

This tricycle is designed for personal transportation. It features a car-like body, windshield, side mirrors, and a roof rack.

Product Overview

Innovative Personal Mobility

This personal transportation tricycle features a unique enclosed car-like body design, offering a comfortable and sheltered commuting experience. Equipped with essential automotive features such as a windshield, side mirrors, and a roof rack, it blends the agility of a tricycle with the convenience of a small vehicle. Its distinctive aesthetic and practical design make it an ideal choice for efficient, short-distance personal transit.
