

Personal USB Air Purifier

This is a compact and portable air purifier designed for personal use. It features a USB interface for power and connectivity.

Overview

Compact Personal Air Purification

This personal USB air purifier is designed to enhance air quality in small, confined spaces such as desktops or personal workstations. Its compact and portable design ensures it can be easily integrated into any environment without taking up significant space. Powered via a standard USB interface, it offers convenient connectivity and ease of use for professional settings.
