Overview

Professional Pet Agility Training Tunnel

This versatile agility tunnel is engineered for professional pet training centers and competitive use, featuring a robust construction of reinforced PVC fabric and helix steel wire. Designed for durability and ease of use, it offers exceptional resistance to tears, water, and varying temperatures, ensuring reliable performance in diverse environments. Its flexible, collapsible design allows for effortless setup, transportation, and storage, making it an ideal choice for portable training setups.

Material & Construction

Primary Material

- Fire-retardant Normal PVC fabric
- 550g Coated PVC fabric
- Helix steel wire reinforcement
- Rubber strip wrapping

Structural Features

Hanging Rings, Steel Collar Ends, Reinforced Helix, Flexible Design

Performance

Operating Temperature

-20 °C

Min Temperature

80 °C

Max Temperature

Resistance Properties

Fire Retardant • Oleic Acid Resistant • Waterproof • Tear Resistant

Dimensions & Customization

Standard Lengths

- 5 Meters
- 10 Meters

Customization

- Custom lengths available
- Customizable colors

Logistics

Easy Handling

The lightweight construction facilitates quick installation and relocation. The tunnel is designed to roll up flexibly, significantly reducing its footprint for easy transportation and compact storage when not in use.
