Product Overview

High-Precision PET Blow Molding Solutions

These high-precision blow molds are engineered for the efficient, high-volume production of various plastic containers, including water, beverage, oil, and jar bottles. Constructed with durable materials and optimized cooling channels, they ensure consistent performance, rapid cycle times, and a superior surface finish. Designed for versatility, these molds support a wide range of bottle sizes and shapes to meet diverse industrial packaging requirements.

Technical Specifications

Key Features

- Optimized cooling channels for rapid cycle times
- Polished cavity surface for high-quality finish
- Multi-cavity design for high-volume production
- Durable construction for extended service life

Machine Compatibility

Standard Blow Molding Machines • 5-Gallon Production Capable

Suitable Applications

Water Bottles, Beverage Containers, Jar Bottles, Oil Bottles

Production Capabilities

Production Efficiency

5 Gallon

Capacity
