

PET Bottle Blow Molding Machine

This plastic machinery is designed for the production of PET bottles. It features a two-stage process: preform heating and bottle blowing.

Product Overview

High-Efficiency PET Bottle Production

This PET bottle blow molding machine is engineered for high-volume industrial production environments. Utilizing a reliable two-stage process, it seamlessly integrates preform heating and precision bottle blowing. The system is equipped with an intuitive control panel, allowing operators to monitor and adjust production parameters with ease for consistent output quality.

Technical Specifications

Application

CSD • PET Bottles

Model Designation

CSD-5P(PET)

Process Type

Two-stage, Preform Heating, Bottle Blowing

Performance Metrics

Production Capability

5 P
