

PET Bottle Chip Granulator for Recycling

This granulator is designed for processing and recycling PET bottle chips. It efficiently granulates the material into smaller, more manageable pieces for further processing or reuse.

Product Overview

Industrial PET Bottle Recycling Solution

This high-performance granulator is specifically engineered for the efficient processing and recycling of PET bottle chips. Built with precision and heavy-duty components, it transforms waste material into uniform, manageable granulates suitable for downstream industrial applications. Its robust construction ensures long-term reliability, making it an essential asset for modern plastics recycling facilities.

Primary Applications

PET Recycling, Plastics Processing, Bottle Chip Granulation

Technical Features

Key Performance Indicators

1 High

Processing Efficiency

Processable Material

PET Bottle Chips
