

PET Bottle Preform Mold

This PET bottle preform mold is designed for efficient production. It features a multi-cavity configuration and an advanced cooling system.

Product Overview

High-Precision PET Preform Mold

This PET bottle preform mold is engineered for high-volume manufacturing environments, offering consistent preform quality and dimensional accuracy. It features a robust, multi-cavity design that supports rapid cycle times through advanced cooling systems. Constructed from high-grade steel, this mold ensures durability and longevity, making it an ideal solution for efficient, large-scale PET bottle production.

Technical Specifications

Detailed view of the high-precision mold components designed for consistent preform quality.

Material	Steel
Runner System	Hot runner, Cold runner
Cavity Configuration	8-92 Cavities
Application	Household Product Mold

Logistics & Packaging

Packaging	Wooden case
