

PET Bottle Stretch Blow Moulding Machine SW-1500

The SW-1500 Stretch Blow Moulding Machine is a high-speed machine designed for the production of PET bottles. It features a complete PET bottle making flow chart, from raw material storage to the final filling process.

Overview

High-Efficiency PET Bottle Production

The SW-1500 Stretch Blow Moulding Machine is engineered for the high-speed, automated production of PET bottles. This comprehensive system integrates the entire manufacturing flow, encompassing preform heating, blowing, and air compression processes. Designed for reliability and consistency, it provides a seamless solution for converting raw preforms into high-quality finished bottles.

Technical Specifications

Model	SW-1500
Machine Type	Stretch Blow Moulding Machine

Process Features

Integrated Workflow

- Preform Injection
- Preform Heating
- Bottle Blowing
- Air Compression

Key Capabilities	High-Speed, Automated, PET Production
------------------	---------------------------------------
