

PET Sheet Recycling and Washing Line

This production line is engineered to crush, wash, dewater, and dry PP and PE film. It features a simple structure, easy operation, high capacity, and low energy consumption, ensuring safety and reliability.

Overview

Professional PET Sheet Recycling Solution

This comprehensive production line is engineered for the efficient crushing, washing, dewatering, and drying of PET sheets. Designed with a focus on high production efficiency and operational reliability, the system ensures optimal cleanliness of recycled materials. It features an automatic control system and a compact structure, making it a robust choice for sustainable waste management facilities.

Performance Metrics

Production Capacity

200 kg/h

Minimum Capacity

2000 kg/h

Maximum Capacity

Residual Water Content

8 %

Operational Features

Key Advantages

- Automatic controlling system
- Compact structure arrangement
- High production efficiency
- Low energy consumption
- Simple operation and maintenance

Processing Capabilities

Crushing, Washing, Dewatering, Drying

Safety & Reliability

Yes
