

Petrol Dispensing Pump

This is a petrol dispensing pump. It is designed for efficient fuel transfer.

Overview

Industrial Petrol Dispensing Solution

This petrol dispensing pump is engineered for robust industrial applications, providing reliable fuel transfer capabilities. Designed as a self-contained hydraulic power unit, it integrates a high-performance electric motor, pump, and precise control valves. The system is mounted on a stable base to ensure ease of installation and operational durability in demanding environments.

Technical Specifications

Integrated Components

- Reservoir
- Electric Motor
- Hydraulic Pump
- Control Valves
- Mounting Base

Design Features

Self-contained System • High Force Capability • Stable Base Mounting

Application Suitability

Industrial, Fuel Transfer, Hydraulic Power
