Overview

Efficient Paddy Harvesting Solution

This petrol engine paddy harvester is a specialized agricultural machine designed for the efficient harvesting of rice crops. Featuring a robust engine and an optimized cutting mechanism, it is engineered to handle various field conditions with ease. The design prioritizes operator comfort with ergonomic handles and adjustable controls, while integrated safety guards minimize debris dispersion during operation.

Technical Specifications

Engine Type	Petrol Engine (Carburetor)
Net Weight	0 KG
Type	Mini Rice Harvester

Key Features

Design Highlights	Ergonomic Handle, Safety Guard, Lightweight Design, Adjustable Controls
