

# Petrol Powered Breaker

The petrol breaker is a powerful demolition tool designed for breaking concrete and asphalt. Its self-contained design eliminates the need for external power sources, making it suitable for remote locations.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Petrol Breaker

This powerful petrol-powered breaker is designed for efficient demolition of concrete, asphalt, and rock. Its self-contained engine eliminates the need for external power sources, providing exceptional mobility and reliability for remote jobsites. Featuring heavy-duty construction and vibration-dampening technology, it is engineered to withstand demanding environments while reducing operator fatigue.

## Technical Specifications

Model Identifier	PPSN55
Power Source	Petrol Engine
Build Quality	Heavy-duty, rugged construction for demanding environments

## Key Features

### Comfort & Ergonomics

Vibration-Dampening Handle • Ergonomic Design • Cordless Operation

### Ideal Applications

Concrete Demolition, Asphalt Breaking, Rock Breaking, Road Repair, Railway Maintenance
