

Petrol Powered Wood Chipper

This petrol chipper is a powerful and efficient machine designed for processing branches and garden waste. Equipped with a robust petrol engine, it offers high performance and mobility, making it suitable for use in various locations without the need for electrical power.

Overview

High-Performance Petrol Wood Chipper

This petrol-powered wood chipper is a robust and efficient solution designed for processing branches and garden waste. Engineered for mobility and high performance, it eliminates the need for electrical power, making it ideal for versatile use in various outdoor locations. Its durable construction and large feeding hopper ensure reliable, long-lasting operation for both professional and domestic maintenance tasks.

Engine & Performance

Maximum Output

4.2 kW

Max Output

3600 r.p.m.

Rated Speed

Engine Displacement	212 cc
Engine Type	OHV

Operational Capacity

Max Chipping Capacity	50 mm
-----------------------	-------

Mobility & Design

Pneumatic Tire Diameter	250 mm
