

PEX Full Port Ball Valve

This full bore ball valve is designed for use with PEX tubing. It has a maximum pressure of 400 PSI and features a red handle for easy operation.

Product Overview

Professional Grade PEX Ball Valve

This full port ball valve is engineered for reliable flow control in PEX tubing systems. Designed with a durable brass body, it ensures long-lasting performance in both potable water and hydronic heating applications. The full bore design minimizes pressure drop, while the intuitive red handle allows for quick and easy on/off operation.

Technical Specifications

Maximum Pressure

400 PSI

Max Pressure
