

Pharmaceutical Production Equipment

This equipment is used in the production of pharmaceuticals. It includes machines for mixing, grinding, and packaging.

Product Overview

Professional Cutting Solutions

This gasoline-powered equipment is designed for high-efficiency cutting operations. Featuring a robust engine and ergonomic handle design, it ensures reliable performance for demanding tasks. Its durable construction and sharp cutting chain make it an ideal tool for professional wood cutting and maintenance applications.

Technical Specifications

Model Identifier	058
Chain Pitch	325

Features

Power Source	Gasoline-powered
Primary Applications	Tree felling, Limb trimming, Wood cutting
