

# Pharmaceutical Production Machinery

This equipment is used in the production of pharmaceutical products. It ensures the accurate and efficient manufacturing of medications and other healthcare products.

## Product Overview

### Industrial Fastening Solution

This blind rivet, also known as a pop rivet, is a specialized fastener engineered to join multiple materials securely. Designed for applications where access to the back of the joint is limited, the rivet utilizes a setting mandrel to create a permanent and robust connection. It is an essential component for assembly processes requiring reliable, blind-side installation.

## Technical Details

Fastener Type	Blind Rivet (Pop Rivet)
Installation Mechanism	Mandrel-driven expansion
Key Features	Blind-side installation, Permanent joint, Mandrel break-off, Secure clamping
