

Pharmaceutical Storage Refrigerator

This refrigerator is designed for the safe and reliable storage of pharmaceuticals, vaccines, and other temperature-sensitive products. It features a precise temperature control system and a digital display for easy monitoring and adjustment of settings.

Overview

Professional Pharmaceutical Storage

The LC-278 is a specialized refrigerator designed for the safe and reliable storage of pharmaceuticals, vaccines, and other temperature-sensitive medical supplies. It features a high-precision control system with dual displays for both temperature and humidity, ensuring optimal storage conditions. With durable construction, double glass doors for visibility, and GSP certification compliance, this unit is an ideal solution for pharmacies, hospitals, and laboratories.
