

Pharmaceutical Water Heater Sterilizer

This pharmaceutical equipment heats or sterilizes water and other fluids. It is commonly used in medical and pharmaceutical settings.

Overview

Professional Pharmaceutical Sterilization

This specialized water heater and sterilizer is engineered for high-precision pharmaceutical and medical applications. Designed with a durable cylindrical housing, it ensures consistent thermal control for water and fluid processing. The integrated temperature monitoring and user-friendly control panel provide reliable operation for critical sterilization tasks.

Technical Specifications

Model Identifier	360
Equipment Category	Water Heater / Sterilizer
Industry Application	Pharmaceutical, Medical, Laboratory

Control & Monitoring

Monitoring Interface

Analog Temperature Gauge • Manual Control Panel

Design & Build

Build Design	Cylindrical vertical unit
