Product Overview

Professional Pharmaceutical Refrigeration

The Pharmacy Showcase PR-90 is a specialized refrigeration unit engineered for the safe, secure, and organized storage of temperature-sensitive medications and vaccines. Designed for healthcare environments like pharmacies and hospitals, it features precise temperature control, fan-assisted cooling for uniform distribution, and an automatic defrost function. Its robust construction, combined with a transparent glass door and adjustable shelving, ensures both durability and efficient inventory management.

Technical Features

Cooling System	Fan-assisted cooling with external condenser
Defrosting	Automatic defrost function
Monitoring	Digital display for temperature and critical parameters

Design & Construction

Door	Transparent glass door
Security	Lockable, Secure Storage
Shelving	Multiple adjustable shelves

Key Performance Indicators

Performance Highlights

1 Uniform

Temperature Distribution

1 Efficient

Heat Dissipation

Compliance & Usage

Ideal For

- Pharmacies
- Hospitals
- Healthcare facilities
- Vaccine storage
