Overview

Professional Pharmaceutical Storage

The Pharmacy Showcase PR-320 is a specialized refrigeration unit engineered for the safe and effective storage of temperature-sensitive pharmaceutical products. Designed for clinics, laboratories, and pharmacies, it features a forced-air cooling system to ensure uniform temperature distribution and product integrity. The unit combines durable, hygienic construction with energy-efficient components to provide a secure and cost-effective storage solution.

Technical Specifications

Storage Features

- Adjustable shelving
- Transparent glass door
- Ventilated lower section for air circulation

Cooling System

Forced-air cooling with external condenser coil

Temperature Management

Digital controls with monitoring and deviation alerts
