

Phosphated Finish Adjustable Wrench

This adjustable wrench features a black phosphated finish for corrosion resistance. It is constructed from hardened steel, offering versatility for various fastener sizes in mechanical and plumbing tasks.

Product Overview

Professional Grade Adjustable Wrench

This adjustable wrench features a durable phosphated finish, specifically engineered for demanding tightening and loosening tasks. Constructed from high-strength hardened steel, it ensures longevity and reliability in both mechanical and plumbing environments. Its versatile design accommodates a wide range of fastener sizes, making it an essential tool for professional maintenance and repair work.

Technical Specifications

Finish Type

Phosphated • Corrosion Resistant

Key Features

- Adjustable jaw capacity
- Corrosion-resistant black finish
- Hardened steel construction

Material

Hardened Steel

Primary Applications

Mechanical, Plumbing, General Maintenance
