

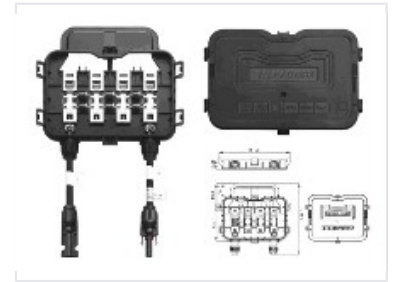

Photovoltaic Solar Panel Junction Box

Photovoltaic junction box designed for solar panel connections. It features multiple input terminals, robust housing, and output cables with connectors for easy integration into solar power systems.

Product Overview

Professional PV Connection Solution

The PV-CY802-M junction box is engineered for reliable electrical connections in solar photovoltaic systems. It provides robust environmental protection and features multiple input terminals for secure solar string integration. Designed for easy installation, this unit effectively shields your solar panels against potential overcurrent and overvoltage hazards.

Technical Specifications

Application Compatibility

- Solar Panel Strings
- Photovoltaic Systems
- General Solar Installations

Model Identifier	PV-CY802-M
Safety Protections	Overcurrent Protection, Overvoltage Protection, Environmental Sealing
