

Photovoltaic Solar Panel Junction Box

This photovoltaic junction box is designed for connecting solar panels. It features secure terminals for reliable electrical connections, a robust enclosure for environmental protection, and cable glands for watertight sealing.

Product Overview

Professional Photovoltaic Junction Box

This photovoltaic junction box is engineered for secure and reliable electrical connections in solar panel systems. It features a robust enclosure designed to provide superior environmental protection against outdoor elements. Integrated cable glands ensure watertight sealing, maintaining system integrity across various installation configurations.

Technical Specifications

Markings

TS • SOLAR

Application

Solar Panel Installations

Core Features

Watertight sealing, Secure terminals, Robust enclosure, Environmental protection
