

Pick Mattock Hand Tool

A pick mattock combines a pickaxe and an adze or mattock. It is used for breaking up hard ground, rocks, or concrete, and for digging, chopping roots, or prying.

Product Overview

Versatile Excavation Solution

The Pick Mattock is a professional-grade hand tool engineered for heavy-duty landscaping, construction, and mining tasks. It features a dual-function head with a pointed pick for breaking through concrete and hard-packed earth, combined with a flat blade for trenching, root removal, and prying. This robust design ensures high efficiency across a variety of demanding ground-breaking applications.

Available Models

P403R, P416R, P407R

Key Features

Head Design
