

Pick Mattock Hand Tool

The pick mattock is a versatile hand tool used for digging and prying. It features a sturdy head with a pick on one end for breaking up hard soil, rocks, and roots, and a mattock blade on the other end for digging and chopping.

Product Overview

Versatile Digging and Prying Solution

The Pick Mattock is a high-performance hand tool engineered for heavy-duty landscaping, gardening, and construction tasks. Featuring a dual-head design, it combines a pointed pick for fracturing stubborn soil, rocks, and roots with a robust mattock blade for efficient chopping and trenching. Built for professional durability, this tool is the ideal choice for breaking up compacted ground and clearing debris in demanding environments.
