

Pig Feed Production System

This system is designed for efficient and high-quality pig feed production. It integrates raw material handling, grinding, mixing, pelleting, cooling, and packaging.

Overview

Comprehensive Pig Feed Production

This industrial-grade production system is designed to handle a wide range of raw materials including corn, grain, alfalfa, and molasses to produce high-quality animal feed. The complete line integrates receiving, grinding, mixing, pelletizing, cooling, and packaging into a streamlined workflow. Engineered for efficiency and durability, the system features stainless steel conditioning for improved cooking and high-precision gear technology for smooth, quiet operation.

Performance

Production Capacity

1 t/h

Minimum Capacity

50 t/h

Maximum Capacity

Pellet Size Range

1.5mm - 18mm

Supported Feed Types

Mash Feed, Pellet Feed, Crumble Feed

Technical Specifications

System Components

- Receiving and Cleaning Equipment
- Grinding Equipment
- Batching and Mixing Equipment
- Pellet Mill
- Cooler
- Crumbler
- Screener
- Packing Machine
- Conveyors

Compatible Raw Materials

- Corn/Maize
- Grass
- Grain
- SBM (Soybean Meal)
- MBM (Meat and Bone Meal)
- Alfalfa
- Molasses
- Straw

Design Features

- Stainless steel conditioner
- Axial steam spraying port
- High precision driving main gear
- Hard tooth surface grinding technology
