Product Overview

High-Performance Pillow Block Bearings

These pillow block bearing units are engineered for reliability and ease of maintenance in industrial environments. Featuring automatic aligning capabilities and robust anticorrosive properties, they provide essential support for rotating shafts while remaining dust-proof. Designed for convenience, these units are simple to fix and dismantle, making them an ideal choice for diverse machinery applications.

Technical Specifications

HS Code	84833000
Model Range	204 to 211

Key Features

Core Features	Automatic Aligning, Repeated Lubrication, Anticorrosive, Dust Proof, Easy Installation
---------------	--

Applications

Suitable Industries

- Food Processing Machinery
- Pharmaceutical Machinery
- Conveying Systems
- Photo & Film Processing
- Dying & Printing Machinery

Available Models

Series Overview

Series Type	Status
UC Series	Available
UK Series	Available
UEL Series	Available
UCP Series	Available
UCF Series	Available
UCFL Series	Available
SC Series	Available
