

Pillow Block Bearing Unit SAF500

The SAF500 is a robust pillow block bearing unit designed for heavy-duty industrial applications. This bearing unit provides reliable support and smooth operation for rotating shafts.

Product Overview

Industrial Heavy-Duty Support

The SAF500 is a robust pillow block bearing unit engineered for demanding heavy-duty industrial applications. Its split housing design simplifies installation and routine maintenance while effectively accommodating shaft alignment variations to minimize vibration. Designed for durability, this unit provides reliable support and high-performance operation in environments such as conveyors and crushers.

Key Features

Main Advantages

Heavy-duty construction, Split housing design, Vibration reduction, High load capacity, Contaminant sealing

Applications

Industry Usage

- Conveyor systems
- Crushers
- Heavy rotating machinery
