

Pipe and Conduit Combination Fitting with Wall Anchor

This combination fitting is designed for securing pipes or conduits. It features dual circular clamps with rubber linings, connected by a threaded rod and wall anchor for stable mounting.

Product Overview

Professional Pipe and Conduit Mounting Solution

This combination fitting is engineered for the secure installation of pipes and conduits in industrial or commercial environments. Featuring a robust metal construction with integrated rubber linings, it ensures a stable, vibration-dampened hold. The inclusion of a wall anchor and adjustable threaded rod mechanism allows for reliable mounting on various surfaces.

Technical Specifications

Clamping Mechanism

- Dual circular clamps
- Central threaded rod
- Integrated spring mechanism

Primary Application

Pipe Securing • Conduit Mounting

Mounting Type

Wall-mounted with anchor

Material

Metal, Rubber Lining
