

Pipe Clamp with Wood Screw

This pipe clamp is designed for securing pipes or conduits to wooden surfaces. It features a metal band that encircles the pipe and is fastened with bolts, along with a wood screw for direct attachment to wood.

Product Overview

Professional Pipe Mounting Solution

This pipe clamp with an integrated wood screw provides a secure and reliable method for mounting conduits and pipes directly onto timber surfaces. Designed for versatility, it is an essential component for plumbing, electrical, and HVAC installations where direct attachment to wood is required. The robust metal construction ensures long-term stability and resistance to mechanical stress in various industrial and residential environments.

Technical Specifications

Material Composition

Metal • Corrosion Resistant

Fastener Type

Pipe Clamp with Wood Screw

Common Applications

Plumbing, Electrical, HVAC, Construction

Mounting Method

Direct to wood surface
