

Pipe Cutter Tool

This pipe cutter is designed for cutting various types of pipes, including copper, aluminum, and steel. It features a robust frame, precision cutting wheel, and smooth adjustment mechanism for efficient and clean cuts.

Product Overview

Professional Grade Cutting Performance

This heavy-duty pipe cutter is engineered for precision and durability in demanding environments. Featuring a robust frame and a smooth adjustment mechanism, it ensures clean, efficient cuts across various materials. Designed for plumbing and HVAC professionals, this tool includes spare cutting wheels to support extended operational life and consistent performance.

Technical Specifications

Key Design Features

- Robust frame construction
- Precision cutting wheel
- Smooth adjustment mechanism
- Includes spare cutting wheels

Compatible Materials

Copper, Aluminum, Steel

Applications

Recommended Industries

Plumbing • HVAC
