

Pipe Grooving Machine for SCH40 Pipes

This heavy-duty pipe grooving machine is designed for SCH40 pipes. It delivers smooth and consistent grooving performance.

Product Overview

Industrial Pipe Grooving Capability

This pipe grooving machine is a robust and reliable tool engineered for high-performance creation of precise grooves in pipes. It utilizes a powerful hydraulic system to ensure smooth, consistent operation and features a user-friendly control panel for efficient parameter adjustments. Designed for versatility, its compact and sturdy build makes it an ideal solution for both demanding on-site tasks and workshop environments.

Technical Specifications

Included Components

- Pinch roller
- Knurl roller

Compatible Pipe Schedule	SCH40
--------------------------	-------

Performance

Key Performance Features	Hydraulic system, Adjustable parameters, Compact design, Industrial grade
