

Pipe Hole Drilling Machine

This pipe hole drilling machine is designed for creating precise holes in pipes. It offers efficient cutting and controlled drilling depth.

Product Overview

Professional Pipe Drilling Solution

This pipe drilling machine is a specialized tool engineered for creating precise holes in pipe systems. Designed with a robust construction, it offers the stability and accuracy required for on-site pipe modification and maintenance tasks. The integrated handwheel mechanism ensures controlled drilling depth, while the powerful motor configuration facilitates efficient and clean hole creation.

Key Features

Capabilities

Precision Drilling, Pipe Maintenance, On-site Modification, Controlled Depth

Technical Details

Operational Components

- Robust motor system
- Handwheel depth control
- Hole saw attachment (optional)
- Drill chuck adapter with hexagonal socket
- Keyless drill chuck for quick changes
