Overview

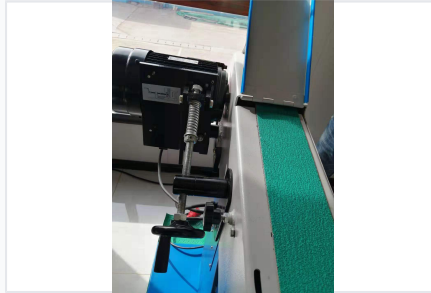

Professional Pipe Notching and Sanding Solution

This multifunctional metalworking machine is engineered for precision pipe notching, metal sanding, and grinding. It features a compound action swivel vice capable of achieving angles between 30-90°, making it ideal for fabrication, welding preparation, and custom pipe fitting. With a robust design, integrated dust management, and versatile roller support, this machine provides a comprehensive solution for efficient surface finishing and joint preparation.

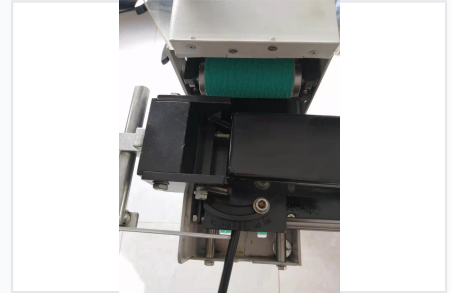

Technical Capabilities

The roller system supports a wide range of pipe and tube diameters for versatile fabrication.

Integrated belt sanding system for efficient surface finishing and shaping.

Adjustable angle guide allows for precise 30-90 degree cuts.

Supported Pipe/Tube Sizes

Pipe Type	Tube Diameter
15mm NB	20mm
20mm NB	26mm
25mm NB	32mm
32mm NB	42mm
40mm NB	48mm
50mm NB	60mm
65mm NB	76mm

Swivel Angle Range

30-90°

Features & Accessories

Machine safety features include clear warning labels and rotation direction indicators.

Included Features

- Compound action swivel vice
- Rear belt sander work table
- Deburring support
- Easy roller changing system
- Roller holder (capacity: 8 rollers)
- Dual dust collection boxes
- Allen key for operation and adjustment

Safety Features

Emergency Stop Button, Protective Guards, Warning Labels, Rotation Direction Indicators
