

# Pipe Reducer Fitting

This metal fitting connects pipes of different diameters. It ensures a secure connection in plumbing and industrial systems.

## Product Overview

### Industrial Pipe Reducer

This durable pipe reducer is precision-engineered to facilitate a seamless transition between piping sections of different diameters. Constructed from high-quality metal with a smooth, matte finish, it is designed for heavy-duty plumbing and industrial piping applications. The fitting ensures a secure, leak-proof connection, making it an essential component for maintaining efficiency in complex fluid management systems.

## Technical Specifications

Nominal Size	1-1/2 inch
Schedule Rating	S40
Material Type	Steel, Iron
Surface Finish	Matte

## Application Details

### Primary Use

Industrial Piping • Plumbing Systems
