

Pipe Threading Machine

This pipe threading machine is designed for efficient and precise threading of pipes. It features a powerful motor and self-centering chuck for smooth operation and extended die life.

Overview

Professional Pipe Threading Solution

The TQ100-BFX is a high-performance pipe threading machine engineered for precision and durability in industrial environments. It features an integrated self-centering chuck and an automated oiling system that ensures consistent thread quality while extending the service life of the dies. Designed for versatility, this machine is an essential tool for demanding applications in plumbing, construction, and large-scale industrial piping projects.

Technical Specifications

Included Tooling

- Threading die head
- Threading dies
- Cutting tool
- Reaming tool

Threading Capacity

1/2 inch to 4 inches

Key Features

Self-Centering Chuck, Built-in Oiling System, High-Performance Motor

Applications

Suitable Industries

Plumbing • Construction • Industrial Piping
