

# Pipe Threading Machine

This threading machine is designed for cutting precise and consistent threads on pipes and cylindrical workpieces. It is suitable for plumbing, construction, and manufacturing applications, and constructed from heavy-duty materials for durability.

## Product Overview

### Professional Pipe Threading Solution

This robust threading machine is engineered to deliver precise and consistent threads on various pipe sizes. Designed for heavy-duty performance in plumbing, construction, and manufacturing, it ensures durability and high-quality results. With features like a self-oiling system and variable speed control, it provides efficiency and reliability for demanding professional applications.

## Technical Specifications

### Key Features

- Self-oiling system
- Variable speed control
- Interchangeable die heads
- Heavy-duty construction

### Build Quality

Heavy-duty • Durable

### Industrial Applications

Plumbing, Construction, Manufacturing
