

Pipe Threading Machine

This pipe threading machine is designed for efficient and precise threading of various pipe sizes. The machine features a self-oiling system to maintain optimal lubrication during operation, extending the life of the threading dies.

Product Overview

Industrial Pipe Threading Solution

This robust threading machine is engineered for efficient and precise processing of pipes ranging from 1/2 inch to 2 inches. Designed for demanding industrial environments, it features a heavy-duty frame and high-quality components to ensure long-term operational reliability. The integrated cooling and self-oiling systems allow for continuous, high-performance operation while protecting the life of the threading dies.

Technical Specifications

Die System

- Quick-change die head
- Self-oiling lubrication system
- Integrated cooling system

Threading Capacity

1/2" to 2"

Safety and Control

Safety Compliance

Emergency Stop, Enclosed Threading Head
