

Pipe Union Chuck

This specialized chuck is designed for holding pipe unions and cylindrical workpieces. It features a circular body with jaws and mounting holes for secure attachment to a machine tool.

Product Overview

Precision Pipe Union Chuck

This specialized chuck is engineered for the secure holding of pipe unions and similar cylindrical workpieces during machining or assembly operations. Featuring a robust circular body with a central aperture and precision gripping jaws, it ensures accurate alignment and stability. Designed with multiple mounting holes on the outer ring, this tool integrates seamlessly with standard machine setups to enhance operational efficiency.

Technical Specifications

Material	Steel
Clamping Mechanism	Internal Jaw Gripping
Mounting Style	Multi-hole Flange Mount
Primary Application	Pipe Unions, Cylindrical Workpieces, Machining, Assembly
