

Piston Air Compressor 76L/min 8Bar

This piston air compressor delivers compressed air at a rate of 76 liters per minute with a maximum pressure of 8 bar. Featuring a 30-liter tank and a 0.75kW motor, it provides reliable power for various pneumatic applications.

Product Overview

Professional Piston Air Compressor

This piston air compressor is designed for reliable performance in various industrial and workshop applications. Featuring a robust construction, it delivers consistent air pressure with a capacity of 76L/min. Compact and maneuverable, it is an excellent choice for powering pneumatic tools and equipment efficiently.

Technical Specifications

Power Output

0.75 kW
Power (kW)

1 HP
Horsepower

Performance Metrics

Metric	Value
Max Pressure	8 Bar
Air Capacity	76 L/min
Rotation Speed	1300 RPM

Model	Z-0.036/8
-------	-----------

Physical Attributes

Tank Capacity	30 L
Dimensions (L x W x H)	67cm x 33cm x 61cm
Piston Configuration	51mm x 1

Certifications

Quality Standards	CE, ISO 9001:2008
