

Piston Ring Set for Internal Combustion Engines

This piston ring set is designed for use in internal combustion engines. The rings ensure proper sealing of the combustion chamber, prevent blow-by, and control oil consumption.

Product Overview

High-Performance Piston Ring Set

This premium piston ring set is engineered for internal combustion engines, providing a critical seal within the combustion chamber. Designed to optimize engine efficiency, these rings effectively prevent blow-by and maintain precise control over oil consumption. The set includes a comprehensive assortment of compression and oil control rings, ensuring a complete solution for engine maintenance and repair.

Technical Specifications

Included Components

- Compression Rings
- Oil Control Rings

Condition

New • Ready for Installation

Application

Internal Combustion Engines
