

Pivoting Cutter and Tongs Set

This set includes a cutter and tongs connected by a pivoting joint. Designed for heavy-duty use, it is suitable for cutting, gripping, or manipulating objects in industrial environments.

Product Overview

Industrial Pivoting Cutter and Tongs Set

This pivoting cutter and tongs set is engineered for heavy-duty industrial applications where precision and safety are paramount. Featuring a robust metallic construction, the tool utilizes a pivoting joint design to facilitate cutting, gripping, and manipulation of objects in confined or hazardous environments. Its ergonomic build ensures reliable performance for tasks requiring mechanical advantage and distance from the workpiece.

Technical Specifications

Design Features

- Pivoting joint mechanism
- Heavy-duty metallic construction
- Extended reach design
- Dual-purpose end fittings

Material	Steel
Primary Functions	Cutting, Gripping, Manipulation

Usage

Suitable Environments

Mechanical • Industrial • Safety-Critical
