

# Plain Trolley for Hoisting Equipment

This plain trolley is designed for specialized hoisting equipment, ensuring reliable quality. Its wheels feature flanges and adjust to different I-beam widths.

## Product Overview

### Heavy-Duty Plain Trolley

This GCT Series plain trolley is engineered for the smooth and reliable horizontal movement of heavy loads in industrial and construction environments. Constructed from durable steel and equipped with sealed bearings, it offers low-friction operation for efficient positioning. The trolley features adjustable flanges, allowing it to adapt to various beam widths for versatile application.

## Technical Specifications

Series	GCT Series
Material	Steel
Country of Origin	China

## Key Features

Core Features	Heavy-duty construction, Sealed bearings, Adjustable flanges, Low friction
---------------	--

## Applications

### Suitable Environments

- Industrial settings
- Warehouses
- Construction sites
