

Plain Trolley - M Type, GCT 610 Series

This plain trolley is designed for smooth and efficient movement of loads along a beam. The M-type design of the GCT 610 Series enhances stability and load distribution for manual operation.

Product Overview

GCT 610 Series M-Type Plain Trolley

The GCT 610 Series (M type) Plain Trolley is a robust and reliable material handling solution designed for the smooth and efficient movement of loads along a beam. Featuring durable construction and precision engineering, this trolley ensures optimal performance and longevity in demanding industrial environments. The M-type design provides enhanced stability and load distribution, making it an ideal choice for workshops, factories, and warehouses requiring manual load transportation.

Technical Specifications

Series	GCT 610 Series
Trolley Type	Plain Trolley (M Type)
Operation	Manual

Key Features

Key Advantages

- Enhanced stability with M-type design
- Optimized load distribution
- Durable industrial construction
- Smooth beam movement
- Versatile for various beam sizes

Application Areas

Suitable Environments	Workshops, Factories, Warehouses
-----------------------	----------------------------------
