

Plasma Cutting Gloves - Deluxe Leather, Heat Resistant

Deluxe plasma cutting gloves are designed for superior hand protection during plasma cutting operations. Constructed from durable leather, these gloves offer excellent heat resistance and abrasion protection.

Product Overview

Professional Plasma Cutting Protection

These deluxe leather gloves are specifically engineered to provide superior hand protection during demanding plasma cutting operations. Constructed from durable split cowhide leather, they offer excellent heat resistance and abrasion protection for industrial environments. The design features a reinforced palm and fingers for enhanced grip, alongside an extended cuff to ensure safety for the wrist and forearm.

Material & Construction

Primary Material	Split cowhide leather
Lining	Unlined (W/O liner)
Cuff Design	Elastic cuff back

Key Features

Durability Features

- Reinforced palm
- Reinforced fingers
- Durable leather construction

Protection Capabilities

Heat Resistant, Abrasion Protection, Extended Forearm Protection
