

Plastic Blow Molding Machine

This industrial plastic blow molding machine is designed for high-volume production. It features precision molding components and an integrated control panel for automated operation, ideal for manufacturing bottles and other hollow plastic products.

Overview

Industrial Blow Molding Solution

This industrial plastic blow molding machine is engineered for the high-volume production of hollow plastic products, including bottles and containers. It features a robust frame and precision molding components designed to ensure consistent output quality. With an integrated control panel and advanced process controls, it offers automated operation and reliable performance for demanding manufacturing environments.

Technical Specifications

Suitable Applications

- Plastic bottles
- Plastic containers
- Hollow plastic products

Model Number

CSD-EB90J2

Capabilities

High-volume production, Automated operation, Precision molding

Safety & Control

Safety Features

Safety enclosures • Advanced process controls

Control System

Integrated control panel for automated operation
